-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 6-12, 14-16, 20-25 and 39 are rejected under 35 U.S.C. 102(b) as being anticipated by WO '473.

WO '473 discloses the addition of cyclodextrin to aqueous dispersions including paints. The cyclodextrin is taught as controlling odor among other functions. Relative amounts such as claimed instantly are also taught.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 17-19 and 40 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO '473.

WO '473 discloses addition of cyclodextrin to aqueous dispersions including paint as discussed above. The reference fails to recite mixing times, time of use after addition of cyclodextrin, the type of substrate to be coated or the type of binder polymer in the paint.

Mixing times and time of use are seen as obvious variants to one of ordinary skill in the art and easily determined by routinism. Applicants list of substrates to be coated are seen as including those typically coated with paint and, therefore, obvious to one of

Art Unit: 1714

ordinary skill in the art. Applicants list of binder polymers is seen as including those commonly employed in the paint arts and therefore obvious.

Claims 5, 13 and 26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 27-38 are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward J. Cain whose telephone number is (571) 272-1118. The examiner can normally be reached on M-F from 10:00 to 6:00.
